EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Stephen Durant on 12/10/2004.

The application has been amended as follows:

IN THE CLAIMS

31. (Amended) An Internet-based method for implementing a business application using object oriented technology and frameworks comprising the following acts:

- a. providing a client input device having a user interface (UI) wherein the UI includes controls whereby a user selects a command and a display whereby results are displayed;
- b. transmitting the command to a server computer comprising a business application management system platform which includes a WDK Web interface server as a part of the business application management system platform, for receiving the user selected command and for processing a web document that is a custom presentation of information;

c. providing a BDK business server electronically coupled to the WDK Web interface server, for storing business objects to and retrieving business objects from a database containing persistent business object data related to the business application;

d. receiving at the client input device a display of results relating to the command, the results obtained by an information distributor server electronically coupled to the WDK Web interface server for generating metadata for a business object, for storing the metadata in a metadata database, for querying the metadata database when asked to do so by a client input device, and for providing the results of a match to a query to the client input device;

whereby the business application is available via the internet to assist a user in performing a specific business operation which requires location of and use of business objects and display of results of the specific business operation to the user in a dynamically selectable format.

2. The following is an examiner's statement of reasons for allowance: None of the prior art of record taken singularly or in combination teaches or suggests a system for implementing a business application using high-level objected oriented technology and frameworks in which a BDK business server electronically coupled to a WDK Web
